

When a small number of students (less than 5) are involved:

Open i>clicker

Go to the options menu and select Loan/Register

Ask the student to hold the On/Off button until the blue light starts flashing (2 seconds) and then push the AA button twice. This will send the clicker ID to the computer and the Remote ID will appear in the "Remote" field as if you had typed it.

Then, if the professor has time, s/he can select the student's ID from the "Student" drop down menu and permanently register the student.

When many (more than 5) students are involved:

OPTION ONE:

After class or in office hours, collect affected students

Open i>clicker

Enable roll call registration

Have affected students register using roll call

\*\*This would be annoying, I think, if you have a really big roster (300+) because the scrolling could take a while...

OPTION TWO:

Open i>clicker

Via Settings and Preferences, enable the voting results grid

Start polling

Have affected students form in a line after class

Have each one come up and vote using their remote. Each student would then write down their clicker ID and register their clicker via the web site.

\*\*You'd have to make sure you gave each student time to check and write down their clicker ID carefully...to avoid mistakes.
