

## Release Notes for i>clicker and i>grader v5.3.0 (Windows)

i>clicker and i>grader v5.3.0 include the following minor enhancements and bug fixes.

- i>clicker and i>grader are now 64-bit compatible.
- An issue related to maintaining anonymous polling data when choosing Resume Last Session has been addressed.
- Resumed session data is now added to the original session rather than creating a second session in i>grader.
- The Student Responses Report now marks students that do not answer an anonymous polling question with “Ab” (absent).
- Edited session names no longer change to all caps when i>grader is closed and re-opened.
- A “can’t save changes” error when changing a session title in i>grader has been fixed.
- A program error caused by using special characters in i>grader session titles has been fixed. i>grader no longer accepts special characters in session titles.
