

# Getting Started with iClicker Reef from your LMS

What do I need if I want to participate in class with...

	Laptop or smart device	iClicker remote	Reef app	Reef account	Reef subscription
 <b>My own smart device</b>	●		●	●	●
 <b>An iClicker remote</b>		●		●	<i>optional</i>
 <b>An iClicker remote and my own smart device</b>	●	●	●	●	●

**NOTE:** Be sure to know what devices your instructor allows before making any purchases.

## How do I get started?

1 Click the iClicker Reef weblink in your school's learning management system (Canvas, Blackboard, Moodle, Sakai, or Brightspace/D2L).

2 **To sign in directly through Reef:** on either the web or mobile app, create a free Reef account if you're new. If you've used Reef before, sign in and skip ahead to step #5.

OR

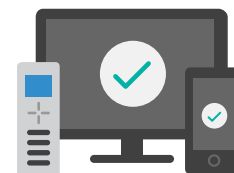

**To sign in through your campus portal:** on the web app, select your institution from the drop down menu and log in with your campus portal credentials. You will then be directed back to Reef to link your account, or to create a new one.

3 If you plan to use an iClicker remote in any of your classes, register the iClicker remote ID in the Profile section of the Reef app menu.

4 Download the mobile app (optional).

5 Your course should have been added automatically. You're ready to join when class is in session! Join from the web, mobile app, or a clicker.
