

Release Notes for iClicker Integrate for Blackboard Learn 9.1+

Building Block v5.3.91 – April 2018

IMPROVEMENTS

- Updated permissions in the manifest.

Building Block v5.3.9 Revised – July 2017

- Documentation updates only. No update to the plug-in.

IMPROVEMENTS

- Updated TLS protocol (to TLS v1.2) in order for institutions that have TLS v1.0 disabled to properly set up the integration if using iClicker 7.14.

Building Block v5.3.9 – March 2017

FIXED DEFECTS

- Fixed security issues.

Building Block v5.3.8 – December 2016

IMPROVEMENTS

- Accommodate Blackboard SaaS environments

NOTE: This release ONLY affects users on Blackboard SaaS and is not an update for other (non-SaaS) Blackboard users.

Building Block v5.3.7 – July 2016

IMPROVEMENTS

- Student registration page updates
- New logging options for admins: none, basic and advanced
- Ignore students who have dropped the course when uploading grades
- Option to restrict access to i>clicker for specific courses

FIXED DEFECTS

- Fixed security issues:
 - Any user could access instructor tools page for any course
 - Any user could run the instructor report
 - Students could manipulate the URL to access a course in which they were not enrolled
 - Tools page URL could be manipulated

KNOWN ISSUES

- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.3.4 – July 2015

ENHANCEMENTS

- i>clicker GO is removed from the remote registration page.
- Changes to email message for unregistered clickers.

FIXED DEFECTS

- Students cannot register remote using a guest login.
- Instructors navigate to instructor reports page instead of select instructor tools when clicking cancel button on instructor reports settings page.
- Fixed typos in admin settings.

KNOWN ISSUES

- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.3.3 – November 2014

ENHANCEMENTS

- i>clicker 7 warns of missing roster file if a properly formatted Blackboard roster is not present
- In addition to remotes, students can now *unregister* their i>clicker GO account in Blackboard.

FIXED DEFECTS

- Timeout when uploading grades issue fixed.
- Error messages appearing when e-mailing All Unregistered Students.

KNOWN ISSUES

- When sending an email reminder to unregistered students from the *Instructor Reports* page, the Blackboard confirmation message incorrectly indicates that an email was sent to the entire class even though only unregistered students are sent an email.
- When sending an email reminder to unregistered students from the *Instructor Reports* page, it is possible for student to click the link inside the e-mail, enter as a guest and register a clicker.
- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.3.1 – June 2014

ENHANCEMENTS

- In addition to remotes, students can now register their i>clicker GO account in Blackboard.
- Compatible with Blackboard Learn April 2014 release.

KNOWN ISSUES

- When sending an email reminder to unregistered students from the *Instructor Reports* page, the Blackboard confirmation message incorrectly indicates that an email was sent to the entire class even though only unregistered students are sent an email.
- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.2.8 – December 2013

ENHANCEMENTS

- Compatible with Blackboard Learn SP14 release.

KNOWN ISSUES

- When sending an email reminder to unregistered students from the *Instructor Reports* page, the Blackboard confirmation message incorrectly indicates that an email was sent to the entire class even though only unregistered students are sent an email.
- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.2.5 – November 2013

FIXED DEFECTS

- Opened logging to allow broad file access. Broader access avoids possible permission errors that slow syncing.
- Admin searches by remote ID are no longer case-sensitive.
- When 'Total Points Possible' is changed within i>grader, the 'Possible Points' of a previously uploaded grade column in Blackboard gets properly updated.

KNOWN ISSUES

- When sending an email reminder to unregistered students from the *Instructor Reports* page, the Blackboard confirmation message incorrectly indicates that an email was sent to the entire class even though only unregistered students are sent an email.
- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.2.3 – July 2013

ENHANCEMENTS

- Instructor reports support sorting by any column header: Course Role, Name, Email, Registered Remote ID, or Registered Date.
- Instructors can search student registrations for a specific Remote ID.
- Certified for Blackboard Learn 9.1 SP 12

FIXED DEFECTS

- Registered remotes can always be shared, even when registered by students from the module.

KNOWN ISSUES

- When sending an email reminder to unregistered students from the *Instructor Reports* page, the Blackboard confirmation message incorrectly indicates that an email was sent to the entire class even though only unregistered students are sent an email.
- Removing remote registrations from the *Instructor Reports* causes a refresh issue where the report appears completely empty until a new report is generated through the report settings.

Building Block v5.0.7 – January 2013

ENHANCEMENTS

- Added i>clicker Registration Module for institution-level registration tool.
- Commas in student first and last names are replaced with a space.
- Student registered Remote IDs are always shown in upper-case.
- Remotes can be shared when registered from the Course Tool and students sharing the remote are not in the same course.
- Admins can generate reports and manage i>clicker registrations across courses.
 - The report can be filtered to show information about a clicker with a specific ID, clickers registered between specific dates, and clickers that are available or disabled.
 - Ability to select and disable registrations.
 - Report can be downloaded as a csv file.
- Admins can configure how and which courses are included in the integration using **Rules and Filters** settings.
- Improved handling of LDAP authentication.
- Improved reliability and diagnostics.
- New logo graphic for admin settings.
- Miscellaneous wording changes in dialogs and confirmation messages.

FIXED DEFECTS

- Version number increased to v5.x to continue numbering where building block from old code base left off.

KNOWN ISSUES

- Sharing is not allowed for any course when registered from the module.

Building Block v1.0.3 – July 2012

Initial release of the plug-in using new code base. Supports student remote registration, instructor download of Blackboard roster to i>grader, and instructor upload of i>clicker scores to Blackboard.
